

Regional MBA

Our regional dual degree programs aim to provide a solid business training in a highly international environment by building on each institution's excellence in management education and by blending the richness and variety of US, Latin American, and Asian programs. Successful graduates will be awarded the HEC MBA degree and the equivalent MBA from the partner institution.

Participants may begin at either institution. Those beginning at HEC will complete the Core Phase, normally from mid-September to mid-May. They then complete the equivalent second year at the partner institution. Conversely, those completing the second portion of their studies at HEC enter directly into the Personalized Phase, normally from September to mid-May or from mid-May to end of December.

During the Personalized Phase, dual degree participants will follow the same course structure, and are expected to carry a full load. All tracks are available, except for the exchange program.
